

Surface Area of Pyramids

Page 3 of 4 pages

Name _____

Date _____ Pd _____

SURFACE AREA = area of bases + area of lateral faces

Find the total surface area of the figure.

FORMULAS

pyramid (lateral)
 $L = \frac{1}{2} P l$
 ↑ slant height
 ↓ perimeter

pyramid (total)
 $S = \frac{1}{2} P l + B$
 ↓ area of base

Steps	Work
1. Shade and name the base	Rectangle
2. Name of the object	Rectangular Pyramid
3. Total or Lateral surface area?	Total
4. Formula from formula chart	$S = \frac{1}{2} P l + B$
5. Plug in numbers	$S = \frac{1}{2}(32)(12) + 60$
6. Solve	$S = 252 \text{ sq ft}$
7. Answer with units	252 ft^2
